

Telehealth Skills
NORTHERN AUSTRALIA
ECHO

Moving knowledge not people

Delivering practical telehealth online education to support the development and implementation of clinical telehealth services across Northern Australia

What is Telehealth Skills ECHO?

- + A series of free, interactive, virtual mentoring sessions to support telehealth service design and delivery in a range of healthcare settings
- + A virtual peer network to share telehealth knowledge and experiences, promoting use of telehealth to improve access to quality healthcare for the north
- + Sessions are open to anyone working in healthcare in Northern Australia who are using or considering using telehealth services.

Monthly sessions include:

- + 10-minute presentation by telehealth skills experts
- + Case study tell us about your telehealth challenge
- + Q+A of the presentation and case study – open to all participants
- + Sessions held via Zoom 1-2pm AEST on the second Thursday each month.

Testimonials

What the participants found most useful

Novel ideas and suggestions for new methods of implementing telehealth solutions.”

Basic tips in set up and troubleshooting variable situations and locations.”

The sharing of everyone’s experiences which I could relate to each scenario, it is inspiring.”

Set up instructions, statistics and examples.”

Great to see the virtual connectivity improve with primary care networks.”

Opportunity to meet telehealth experts and share experiences.”

General feedback

Working in telehealth, this is a great networking and information sharing experience.”

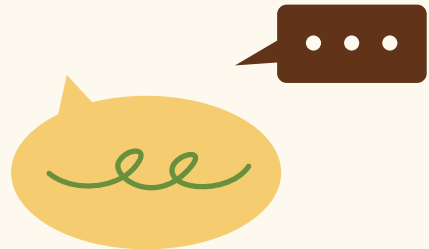

Interesting presenters, everything was very inciteful.”

Broad range of subjects covered. Excellent sessions!”

Presenters were highly engaging and knowledgeable in their areas. Will definitely recommend to my networks.”

Telehealth Skills ECHO is based on an international evidenced based Project ECHO® Telementoring program. There is no cost to attend sessions. Telehealth Skills ECHO is funded by the CRCNA and delivered by The University of Queensland, Centre for Online Health.
